TEXORA · LECTURE SHEET · COURSE GUIDE

Elective-IV Sessional (4202): Your Specialization in the Laboratory

Course 4202 has no syllabus of its own in the term list — the syllabus book sends you to the Specialization sections at the end of the book. This guide explains the slot, names the sessional course that fills it in each of the four tracks, and shows where its experiment sheets live in Texora.

4202 · ELECTIVE-IV SESSIONAL · GUIDE · LEVEL 4 TERM 2

1. The course in brief

In the Level 4 Term 2 course list, **4202** is printed without a departmental prefix because it is a **slot**: the sessional (laboratory/practical) companion of Elective-IV. The syllabus book prints the slot's frame and one instruction:

ITEM	AS PRINTED FOR 4202 ELECTIVE-IV SESSIONAL
Class hours	45 total (3 per week)
Credit	1.5
Topic list in the term list	None — the book states: *details can be found in the specialization course's content sections at the bottom (end) of the syllabus*

The slot is filled by your **specialization track's** 4202 sessional course — the practical partner of the 4201 theory course you are taking in the same track this term.

2. The four tracks and their 4202 courses

TRACK	SPECIALIZATION	THE COURSE THAT FILLS SLOT 4202 (1.5 CREDITS, 45 HOURS)
YM	Yarn Manufacturing Engineering	**YM-4202 · Modern Yarn Manufacturing Sessional**
FM	Fabric Manufacturing Engineering	**FM-4202 · Advanced Knitting Sessional**

WP	Wet Processing Engineering	**WP-4202 · Textile Finishing Sessional**
AM	Apparel Manufacturing Engineering	**AM-4202 · Advanced Apparel Manufacturing-II Sessional**

THEORY AND SESSIONAL ARE ONE SUBJECT IN TWO ROOMS

Each track's 4202 sessional practices what its 4201 course teaches: the YM pair works modern spinning machinery, the FM pair knitting practice, the WP pair finishing production and testing, the AM pair advanced apparel production. Prepare for the sessional from the 4201 theory sheets and use the sessional's experiment sheets to revise the theory — in a sessional examination the viva moves between the two without warning.

3. Working rules for a sessional slot

- **Your experiments are your track's experiments.** The experiment list, machinery and materials are those of your track's 4202 course in the Specialization section — not the generic term list.
- **The laboratory record is the coursework.** As with every sessional in this degree, the running record of each experiment — aim, apparatus, procedure, observations, calculations, result — is what the final assessment is built on. Write it in the laboratory, not from memory afterwards.
- **Preparation checklist (guidance).** Before each session: read the experiment sheet; note the machine settings and safety points; carry the record book and calculator. After each session: complete the calculations the same day; file the sheet; list the viva questions the experiment suggests and answer them from the paired 4201 theory.

4. Finding your sheets in Texora

1. Open Texora and go to the **Specialization Courses** section of the Syllabus area.
2. Open your track's page — **Yarn Manufacturing**, **Fabric Manufacturing**, **Wet Processing** or **Apparel Manufacturing**.
3. On the track page, open the course coded **<track>-4202** — e.g. *FM-4202 Advanced Knitting Sessional*. Its sheets are written in experiment format: aim and theory, apparatus and procedure, worked calculations, precautions, and viva preparation with an answer key.

This guide sheet is filed under the bare code **4202** in the Level 4 Term 2 list, exactly as the syllabus book prints the slot. The experiment content lives, as the book directs, in the specialization sections — and in Texora, on the four track pages.

Glossary

Sessional — a laboratory/practical course assessed through continuous laboratory work and a final practical/viva examination. **Elective slot** — a term-list position whose actual course is set by the student's specialization track. **Laboratory record** — the running written account of each experiment, the primary coursework evidence of a sessional.

Key points

• 4202 Elective-IV Sessional: 45 class hours, 1.5 credits — the practical companion of 4201, filled by your track's sessional course.
• YM-4202 Modern Yarn Manufacturing Sessional · FM-4202 Advanced Knitting Sessional · WP-4202 Textile Finishing Sessional · AM-4202 Advanced Apparel Manufacturing-II Sessional.
• Revise 4201 theory and 4202 practice together; the sessional viva crosses between them.
• In Texora: Syllabus → Specialization Courses → your track page → the <track>-4202 course.

5. Practice (orientation questions)

1. Give the course code and exact title of the 4202 course for the Apparel Manufacturing track, with its credit.
2. Why does the term list print no experiments for 4202, and where are they found?
3. A WP student prepares for the finishing sessional using only the sessional sheets. What is missing from the preparation, and why does it matter in the viva?

Answer key

1. **AM-4202 · Advanced Apparel Manufacturing-II Sessional**, 1.5 credits (45 hours).
2. Because 4202 is a slot: the syllabus book prints only the frame and refers to the Specialization sections at the end of the book, where each track's 4202 course carries its own experiment list. The absence in the term list means the content is track-specific, not that it is absent.
3. The theory half: the sessional's experiments are applications of WP-4201 Textile Finishing — mechanisms, recipe logic and test principles are examined viva-style alongside the practical work. Preparing both halves (and being able to walk from an experiment to its theory and back) is what the paired preparation in Section 3 is for.
