TEXORA · LECTURE SHEET · COURSE GUIDE

Elective-I (3207): Choosing Your Specialization Track

Course 3207 has no syllabus of its own in the term list — the syllabus book itself sends you to the Specialization course sections at the end of the book. This guide explains what the slot is, which course fills it for each of the four tracks, and where its lecture sheets live in Texora.

3207 · ELECTIVE-I · GUIDE · LEVEL 3 TERM 2

1. The course in brief

In the Level 3 Term 2 course list, **3207** is printed without a departmental prefix — unlike its neighbours TE-3201 or ME-3203 — because it is not one course but a **slot**: the first elective of the degree. The syllabus book prints only the slot's frame and one instruction:

ITEM	AS PRINTED FOR 3207 ELECTIVE-I
Class hours	30 total (2 per week)
Credit	2.0
Topic list in the term list	None — the book states: *details can be found in the specialization course content sections at the bottom (end) of the syllabus*

So the content of your 3207 is decided by the **specialization track** you follow. There are four tracks, and each track's own 3207 course — printed in the Specialization section at the end of the syllabus book — is what fills this slot.

2. The four tracks and their 3207 courses

TRACK	SPECIALIZATION	THE COURSE THAT FILLS SLOT 3207 (2.0 CREDITS, 30 HOURS)
YM	Yarn Manufacturing Engineering	**YM-3207 · Advanced Spinning Calculations**
FM	Fabric Manufacturing Engineering	**FM-3207 · Advanced Weaving and Knitting Calculations**

WP	Wet Processing Engineering	**WP-3207 · Advanced Machineries and Relevant Calculations**
AM	Apparel Manufacturing Engineering	**AM-3207 · Advanced Machineries and Relevant Calculations**

Note that the WP and AM tracks give their 3207 courses the same title — Advanced Machineries and Relevant Calculations — but the machinery is each track's own: wet-processing machinery in WP, apparel-production machinery in AM. They are different courses that happen to share a name; the track code, not the title, tells you which one is yours.

> **THE CHOICE IS BIGGER THAN ONE COURSE**
>
> The track you enter at 3207 is the track of your remaining electives: Elective II (4101), Elective II Sessional (4102) and Elective III (4103) in Level 4 Term 1, and Elective-IV (4201), Elective-IV Sessional (4202) and Elective-V (4203) in Level 4 Term 2 all continue the same specialization. Elective-I is therefore the first step of a six-course path, not a one-term preference — choose it as the start of the specialization you want your final year, project work and internship to build on.

3. How the choice is made

- **One track per student.** Every student fills slot 3207 with exactly one track's course and is examined on that course; there is no combined or partial version.
- **The selection is run by the department** for the term, under its elective allocation notice — follow that notice for the mechanics (how preferences are submitted, any seat limits per track, and the deadline). Those administrative details come from the department, not from the syllabus book, and this guide does not guess them.
- **Choose on direction, not on rumour.** The honest criteria are the work itself: which department of a mill you want to be strongest in — spinning (YM), fabric formation (FM), dyeing and finishing (WP), or apparel production (AM) — and which final-year project and internship you intend to pursue. All four tracks carry the same credit and the same examination weight.
- **Read before you choose:** the first sheet of each track's 3207 course (Section 4) is the fastest reliable preview of what the track actually studies — fifteen minutes of reading that is worth more than a corridor opinion.

4. Finding your sheets in Texora

1. Open Texora and go to the **Specialization Courses** section of the Syllabus area (it sits below the term cards, because the tracks cut across terms).

2. Open your track's page — **Yarn Manufacturing**, **Fabric Manufacturing**, **Wet Processing** or **Apparel Manufacturing**.
3. On the track page, open the course coded **<track>-3207** — e.g. *YM-3207 Advanced Spinning Calculations*. Its topic sheets are the lecture sheets for your 3207.
4. The other six courses listed on the same track page (4101, 4102, 4103, 4201, 4202, 4203) are your later electives in the same track — the track page is the map of your whole specialization.

This guide sheet is filed under the bare code **3207** in the Level 3 Term 2 list, exactly as the syllabus book prints the slot. It deliberately contains no topic content of its own: the content lives, as the book directs, in the specialization sections — and in Texora, on the four track pages.

Glossary

Elective slot — a position in the term's course list (here, code 3207) whose actual course is chosen from a set of alternatives rather than fixed for all students. **Specialization track** — one of the four final-year concentration paths (YM, FM, WP, AM); each track is a family of courses sharing one slot code pattern. **Track code** — the two-letter prefix (YM/FM/WP/AM) that replaces the departmental prefix on specialization course codes, e.g. WP-3207.

Key points

• 3207 Elective-I: 30 class hours, 2.0 credits — a slot, not a single course; the syllabus book prints no topics for it and refers to the Specialization sections.
• Your 3207 is your track's course: YM-3207 Advanced Spinning Calculations · FM-3207 Advanced Weaving and Knitting Calculations · WP-3207 and AM-3207 Advanced Machineries and Relevant Calculations (different courses, same title).
• The same track continues through 4101, 4102, 4103, 4201, 4202 and 4203 — Elective-I starts a six-course specialization.
• In Texora: Syllabus → Specialization Courses → your track page → the <track>-3207 course.

5. Practice (orientation questions)

Short questions to check you have the slot's structure right; brief answers follow.

1. A classmate says "3207 is an easy course — it has no topics in the syllabus." Correct the statement in two sentences.
2. You intend to specialize in dyeing and finishing. Give your track code, your 3207 course code and its exact title.

3. Two students both hold a course titled "Advanced Machineries and Relevant Calculations" for 3207, yet sit different examinations. Explain how that is possible.
4. Why does Texora file this guide under the code "3207" instead of under one of the track codes?

Answer key

1. 3207 has no topics in the *term list* because it is an elective slot: the syllabus book directs students to the Specialization sections at the end of the book, where each track's 3207 course has its full topic list. The absence of topics on that page means the content is chosen, not that it is absent.
2. Wet Processing track — code **WP**; course **WP-3207**, titled **Advanced Machineries and Relevant Calculations** (the wet-processing machinery course, 2.0 credits, 30 hours).
3. Because WP-3207 and AM-3207 share the printed title but are different courses in different tracks — one on wet-processing machinery, one on apparel-production machinery. The examination follows the track code and the track's own syllabus section, not the title.
4. Because the slot itself belongs to no track: the guide explains the choice all students face before a track is picked. Filing it under the bare printed code mirrors the syllabus book, where 3207 appears in the term list without a prefix, and keeps the guide findable from the Level 3 Term 2 course list.
