TEXORA · LECTURE SHEET · COURSE GUIDE

Elective-V (4203): The Last Specialization Course

Course 4203 has no syllabus of its own in the term list — the syllabus book sends you to the Specialization sections at the end of the book. This guide explains the slot, names the course that fills it in each of the four tracks, and shows where its lecture sheets live in Texora.

4203 · ELECTIVE-V · GUIDE · LEVEL 4 TERM 2

1. The course in brief

In the Level 4 Term 2 course list, **4203** is printed without a departmental prefix because it is a **slot**: the fifth and last elective of the degree. The syllabus book prints the slot's frame and one instruction:

ITEM	AS PRINTED FOR 4203 ELECTIVE-V
Class hours	45 total (3 per week)
Credit	3.0
Topic list in the term list	None — the book states: *detailed contents can be found in the specialization course's sections at the bottom (end) of this syllabus*

• **Read the book's note carefully:** for 4203 the book prints *"Detailed contents can be found in the specialization course's sections at the bottom of this syllabus."* For 4201 and 4202 the wording is slightly different — *"Details can be found in the specialization course's content sections at the bottom of this syllabus."* The meaning is the same instruction (go to the Specialization sections); only the phrasing differs, and Texora's guides quote each note as printed for its own slot.

Your 4203 is your **specialization track's** 4203 course — the final taught course of the specialization that began at 3207.

2. The four tracks and their 4203 courses

TRACK	SPECIALIZATION	THE COURSE THAT FILLS SLOT 4203 (3.0 CREDITS, 45 HOURS)

YM	Yarn Manufacturing Engineering	**YM-4203 · Technical Fibre & Yarn**
FM	Fabric Manufacturing Engineering	**FM-4203 · Fabric Mechanics**
WP	Wet Processing Engineering	**WP-4203 · Special Wet Processing**
AM	Apparel Manufacturing Engineering	**AM-4203 · Fashion Design and Product Engineering**

These four are the most individual courses in the degree — technical fibres, fabric mechanics, special wet processing, fashion design — each a different discipline wearing the same slot number. As always in the specialization, the **track code** is the identity.

> **THE SPECIALIZATION, COMPLETE**
>
> With 4203, the track's seven courses are complete: 3207 → 4101 → 4102 → 4103 → 4201 → 4202 → 4203. Nothing in the specialization comes after this term; the remaining Level 4 Term 2 work — TE-4207 project, TE-4208 comprehensive viva, TE-4209 internship — draws on the whole track, and on this course's material in particular as its most recent theory.

3. How it works

- **Your paper is your track's course.** There is no shared or cross-track paper for slot 4203.
- **No sessional partner.** Unlike 4201 (paired with 4202), Elective-V stands alone as a theory course; its companion work this term is the project, the internship preparation and the comprehensive viva.
- **High viva value.** In the TE-4208 comprehensive viva, the freshest specialization course is a natural starting point for the board. Revise this course's sheets with the viva in view, not only its own examination.

4. Finding your sheets in Texora

1. Open Texora and go to the **Specialization Courses** section of the Syllabus area.
2. Open your track's page — **Yarn Manufacturing**, **Fabric Manufacturing**, **Wet Processing** or **Apparel Manufacturing**.
3. On the track page, open the course coded **<track>-4203** — e.g. *YM-4203 Technical Fibre & Yarn*. Its topic sheets are the lecture sheets for your 4203.

This guide sheet is filed under the bare code **4203** in the Level 4 Term 2 list, exactly as the syllabus book prints the slot. It deliberately contains no topic content of its own: the content lives, as the book directs, in the specialization sections — and in Texora, on the four track pages.

Glossary

Elective slot — a position in the term's course list whose actual course is set by the student's specialization track. **Specialization track** — one of the four final-year concentration paths (YM, FM, WP, AM). **Track code** — the two-letter prefix (YM/FM/WP/AM) on specialization course codes, e.g. WP-4203.

Key points

• 4203 Elective-V: 45 class hours, 3.0 credits — the last specialization slot; the book's note for it reads “Detailed contents can be found…” (4201/4202 print a slightly different wording).
• Your 4203 is your track's course: YM-4203 Technical Fibre & Yarn · FM-4203 Fabric Mechanics · WP-4203 Special Wet Processing · AM-4203 Fashion Design and Product Engineering.
• It completes the seven-course specialization and is prime material for the TE-4208 comprehensive viva.
• In Texora: Syllabus → Specialization Courses → your track page → the <track>-4203 course.

5. Practice (orientation questions)

1. Quote the syllabus book's note for 4203 exactly as printed, and state how it differs from the 4201 note.
2. Give the 4203 course code and title for the Fabric Manufacturing track.
3. “Elective-V has no sessional, so it needs less revision than 4201.” Challenge this claim.

Answer key

1. 4203 prints: *“Detailed contents can be found in the specialization course's sections at the bottom of this syllabus.”* The 4201/4202 note reads *“Details can be found in the specialization course's content sections at the bottom of this syllabus.”* — “Detailed contents” versus “Details”, and “sections” versus “content sections”; the instruction itself is identical.
2. **FM-4203 · Fabric Mechanics** (3.0 credits, 45 hours).
3. The conclusion does not follow. Elective-V carries the same 3.0 credits as Elective-IV, and it doubles as the freshest specialization material for the TE-4208 comprehensive viva, which examines the whole degree. If anything, its sheets deserve revision in two passes: once for its own paper, once in viva form.
